

# **SDI** FACILITATION SYSTEM

VERSION 2.0

SDI Facilitating Made Easy

**SDI FACILITATION SYSTEM** is a powerful, easy-to-use way to improve the training experience for you and your participants. This is the ultimate facilitation suite harnessing the power of technology and the Internet to quickly process inventories and get right to the good stuff.

## Administering inventories has never been easier...

Have a limited amount of time for training? Because it's online, your participants can complete all their assessments as pre-work – any time, at their own pace, from any computer connected to the Internet.

## Managing training sessions has never been easier...

Manage data and track the status of all your online sessions. Plus, access to the results of everyone you train is just a few button clicks away.

## Charting participant arrows has never been easier...

Whether using paper-based or online inventories, arrows are generated in seconds.

## Generating reports and group arrow charts has never been easier...

Facilitators can generate, print, and organise an extensive range of reports and arrow charts from both paper-based and online inventories. And these online reports are output as PDF documents for easy emailing or printing.

## Collecting 360-degree feedback has never been easier...

Set the maximum number of feedback providers allowed by each participant and then they do the rest. Your participants simply enter names and email addresses of people they want feedback from; invitations are automatically sent.

## Personalising the system has never been easier...

Participants will see your company logo and contact information on reports and when completing inventories online.

## Protecting session data has never been easier...

"Company," "Facilitator," and "Stakeholder" levels give you the flexibility to give people just the right access to data. Stakeholder access allows you to invite key people like client contacts to monitor the activity of a session to ensure timely completion of inventories by participants. Only Qualified Facilitators with proper authorisation can view results.

## Features

- Anywhere, anytime access through the Internet
- Automatically generated unique passwords for participants for privacy
- Automated reminder emails to participants
- Manage, track, and archive data from all training sessions – past & present
- Print individualised reports or provide pre-printed Interpretive Guides
- Generate reports directly to PDF for immediate printing or emailing
- Include company logo and contact information
- Manually enter results from paper inventories
- Restrict access to data with multiple user levels
- Automatic data backup on firewall-protected servers
- Multiple languages for reports and inventories
- Pay-as-you-go billing for inventory usage
- Purchase inventory credits in advance for quantity discounts
- Prints arrow charts as large as you need them

## INTERPRETIVE GUIDES

Provide your participants with interpretive information as a PDF or pre-printed format.

## Inventories Available Online

- Strength Deployment Inventory
- Feedback Edition of the SDI
- Expectations Edition of the SDI
- Portrait of Personal Strengths
- Portrait of Overdone Strengths
- Feedback Portrait of Personal Strengths
- Feedback Portrait of Overdone Strengths
- Expectations Portrait of Personal Strengths\*

\*Not available on the desktop utility

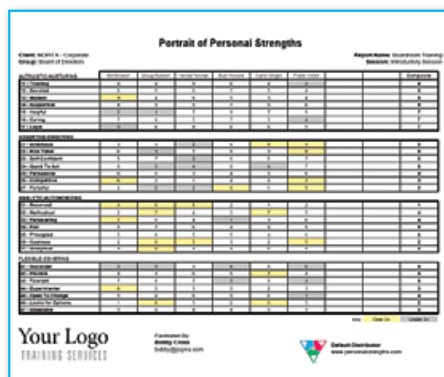

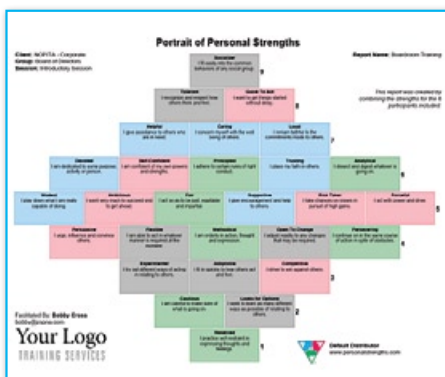

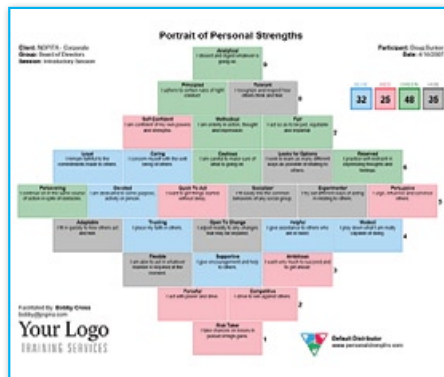

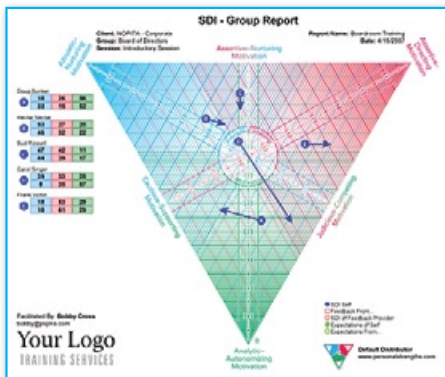

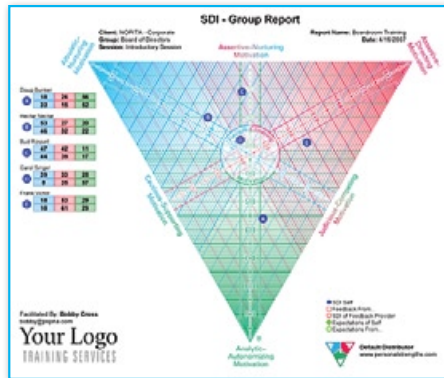

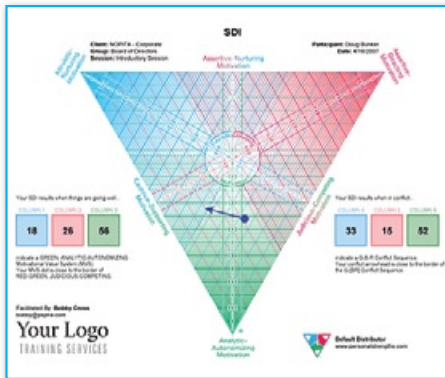

“This system will fundamentally change my practice. **I can do things for my clients now that I never have taken the time to prepare before**—which lets me facilitate important conversations that would not have happened otherwise.” - Ken Smith, Strategic Solutions

## Reports and Arrow Charts

Here is just a sampling of the dozens of different ways you can organise and display individual or group results...

### FREE INVENTORY CREDITS:

Your purchase of the SDI Facilitation System includes 12 pre-paid inventory credits (4 SDIs, 4 Portraits of Personal Strengths, and 4 Portraits of Overdone Strengths — a £90 value).

## NO INTERNET? NO PROBLEM... SDI Facilitator Software Utility

Included with your SDI Facilitation System is a downloadable desktop software utility that gives you reporting features and arrow charting even when an Internet connection is unavailable. With this software, you will be able to instantly chart arrows and produce color-coded portrait results right from your computer. You can also display or print individual or group results in dozens of different ways. *NOTE: This utility and the online system are mutually exclusive and do not share data without manual entry.*
